### **DETAILED ACTION**

Claims 51-54 are pending.

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 1, 2006 has been entered.

#### ***Specification***

2. The disclosure is objected to because of the following informalities: the abstract is required on a separate sheet.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 51-54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The concentrations set forth in claims are not

Art Unit: 1712

*ipso verba* set forth in the original disclosure, appear to be calculated values, and/or are unsupported. Applicants' stated basis for the limitations does not include: (1) the modification of the range 38 to 42 wt. % by "about", (2) the limitation of "a phosphorous acid solution being about 70 wt. % phosphorous acid", and (3) the relative "wt. %" set forth in claims 52-54.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

6. Claims 52-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 52-54, the limitations to the relative "wt. %" are indefinite since it is unclear whether the wt. % refers to each of the solutions or the wt. % of the reaction product.

### ***Response to Arguments***

7. Applicant's arguments filed August 1, 2006 have been fully considered but they are not persuasive.

8. Regarding the abstract, the abstract needs to be submitted on a separate sheet.

9. Applicant's arguments with respect to new claims 51-54 have been considered but are moot in view of the new ground(s) of rejection.
